

Attachment 3. Status of GWMP

This proposal is to develop a groundwater management plan ("GWMP"). The GWMP will contain those elements required by California Water Code ("CWC") § 10750, et seq, and consider optional elements. A draft GWMP has not been developed because the CWC is very clear on the required and optional contents. Based on starting the project on April 1, 2013, the GWMP will be adopted on May 6, 2014.
